

Archery

Within the ranch there is an archery range of 50 m long that is adapted to both beginners and active archers. Under expert guidance, both children and adults can shoot at the same time because the distance of the target is adjusted to their different strength, and the whole family can simultaneously enjoy doing this ancient skill.

The equipment is adapted to all ages and provides complete protection and safety. At the same time, a group of up to 8 adults can shoot. At explicit request, it is possible to set the target at a greater distance.

Guests wishing to stay longer in the Camp can also complete a shorter archery course (8-12 hours), which will learn about history and tradition as well as basic training in Mediterranean archery. As part of the training, guests will also have a detailed knowledge of the equipment and will know how it is maintained and repaired, which will make it easier for them to engage in archery.
